Excellency,

I have the honour to inform you that the International Atomic Energy Agency (IAEA) requires consultant's advice at the **Operational Safety Review Team (OSART) Mission to the Loviisa Nuclear Power Plant (NPP)**, Finland, from **5 to 22 March 2018**.

The purpose of this mission is to provide advice and assistance on how to achieve excellence in operational safety through the exchange of first-hand experience and knowledge between team members and the plant personnel. The composition of the OSART ensures an international perspective as it carries out an objective evaluation of the plant's operational safety performance against generally accepted international good practices. Therefore, the consultant's expertise should include the area of Training and Qualifications.

In this regard, I should be grateful if your Government would make available the services of Mr Yinliang Mo, CNNP Nuclear Power Operations Management Ltd., Haiyan, Zhejiang, PRC 314300; Telephone; +86 13706588204; Email; moyl@cnnp.com.cn for this assignment.

The IAEA will provide the consultant with travel and living expenses, including incidentals, connected with the mission in accordance with the IAEA's procedures for non-staff travel.

It should be noted that compensation is not payable by the IAEA for any damage to or loss of personal property. The IAEA also does not provide health insurance coverage for participants in meetings, workshops or training courses or for consultants. Arrangements for private insurance coverage on an individual basis should therefore be made. The IAEA will, however, provide insurance coverage for accidents and illnesses that clearly result from any work performed for the IAEA.

It would be appreciated if your Government's confirmation could reach the IAEA not later than **5 February 2018**. Mr Fuming Jiang, (F.Jiang@iaea.org) of the Division of Nuclear Installation Safety is the Team Leader for this mission who will contact the consultant directly concerning further arrangements.

Accept, Excellency, the assurances of my highest consideration.

Greg Rzentkowski
Director
Division of Nuclear Installation Safety
